I am sure you have heard about global warming. Global warming may make the sea level become higher. Do you know why? It is because global warming causes the earth to be warmer and this in turn makes glaciers melt.

What is a glacier? It is a large sheet of ice that moves very, very slowly. Some melting glaciers add more water to the ocean. Higher temperatures also make water expand. When water expands in the ocean, it takes up more space and the level of the sea rises.

Coastal flooding could cause salt water to flow into areas where salt is harmful, threatening plants and animals in those areas. Leaders of all nations around the world are in the fight against global warming but "change only happens when individuals take action."

 B. Because of leaders of all nations around the world.  
 C. Because of higher temperatures.  
 D. Because of individuals.
31. *What will be threatened if salt water flows into areas where salt is harmful?*  
 A. Trees and animals in those areas.  
 B. Buildings in those areas.  
 C. Glaciers in those areas.  
 D. Rivers in those areas
32. *Which of the following statements is NOT TRUE, according to the passage?*  
 A. Water expands because of higher temperatures.  
 B. A glacier is a large sheet of ice that moves very fast.  
 C. Global warming may make the sea level become higher.  
 D. Leaders of many countries in the world are fighting against global warming.

I am sure you have heard about global warming. Global warming may make the sea level become higher. Do you know why? It is because global warming causes the earth to be warmer and this in turn makes glaciers melt.

What is a glacier? It is a large sheet of ice that moves very, very slowly. Some melting glaciers add more water to the ocean. Higher temperatures also make water expand. When water expands in the ocean, it takes up more space and the level of the sea rises.

Coastal flooding could cause salt water to flow into areas where salt is harmful, threatening plants and animals in those areas. Leaders of all nations around the world are in the fight against global warming but "change only happens when individuals take action."

Each correct answer gets 0,2 pt

### Audio script: Skills 2 Unit 11

**Nick:** Hey, Duong and Chau, do you remember Dr. Nelson's talk science and technology?

**Chau:** Yes. He said that science and technology would help us solve the world's problems in the future.

**Nick:** Right. I think world hunger is a problem now, and develops ways to get high yields in farming will help feed the growing population on earth.

**Duong:** Good point. Also we may be able to live on other planets, and overcrowding won't be a problem any more...

**Nick:** And I like the idea of having lessons at home with a robot, and the Internet.

**Duong:** And no more paper books. We'll have e-books, and tablets for everything.

**Chau:** That doesn't sound like a benefit to me. I'd still want to go to school. I'd like to communicate face-to-face with teachers and friends. In my opinion, science and technology will bring new problems to people.

**Duong:** Like what?

**Chau:** Well, robots will bring unemployment, and high yields in farming may destroy the environment and sending people to Mars may cause pollution...

**Nick:** You're right: so many new problems...
