C. are

D. have

Question 27: A. pollution

B. polluting

C. polluted

D. pollute

Question 28: A. advantage

B. disadvantages

C. disadvantage

D. advantages

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions.

Large cities often have problems that small towns and rural areas do not have. Two of the biggest problems are heavy traffic and the pollution that cars create. Of course, traffic problems and pollution are not only found in big cities. However, the higher populations and larger number of cars on the roads in cities can make the problems happen more often and with more effects that are noticeable.

One of the most common traffic problems the large cities have is congestion. As the population of a city increases, so does the number of cars on the road. Cities cannot always improve the number and size of their roads and highways to keep up with the number of cars. The result is traffic congestion, or traffic jams.

When traffic jams happen, cars that are stuck in the congestion continue to run their engines. This creates pollution and is a big problem. Pollution causes health problems for the people in cities and hurts the environment.

Question 29: Where do traffic problems and pollution frequently happen?

A. In small towns

B. In rural areas

C. In big cities

D. In remote villages

Question 30: According to the passage, what causes traffic congestion in big cities?
